

HTA report template based on the HTA Core Model

National uptake @ KCE
Raf Mertens

Description

Pilot project

To adapt the template of local HTA reports to the HTA Core Model structure.

Objective

Facilitate re-use of local HTAs

Results

- The **questions** are used as a check list to ensure each domain is addressed by our report; questions acronym is included in the text
- The **main domains** are used to structure the report (headings 1)
- The domain “**Health problem and current use of the technology**” has been split in two

Lessons learned

- The list of questions has a diagnostic technology as a background?
- The duplication of information between chapters makes the process heavy → hyperlinks?

Next step

- Radicalise the concept of mutually \pm independent cards
- Ergonomics, ergonomics, ergonomics
(for HTA do-ers, re-users, decision makers)
