

Views on successes, value and impact of JA2 collaboration for non-pharma technologies:

HTA agency expert (EUnetHTA)

Brussels, Oct. 16th 2015

Ludwig Boltzmann Institute for Health Technology Assessment, Austria

Claudia Wild, Anna Nachtnebel, Julia Mayer

Reminder: Objectives of EUnetHTA

EUnetHTA supports collaboration between European HTA organisations that brings added value at the European, national and regional level through

- facilitating efficient use of resources available for HTA
- creating a sustainable system of HTA knowledge sharing
- promoting good practice in HTA methods and processes.

successes, value and impact 1/3

From great variety of HTA products and processes to harmonization of methods and processes (in EUnetHTA)

- Template for standardized manufacturers' submissions,
- Model for the standardized reporting of the evidence (HTA CoreModel[®]),
- Database to collect additional needs for evidence generation (EVIDENT Db)
- Methodological guidances on endpoints, comparators, safety etc.
- Initiation von standard processes, incl. quality assurance

= common set of principles and methodological approaches (reliable, transparent, transferable HTA products)

successes, **value** and impact 2/3

Quality and Relevancy as key factors

Success factor: Quality

- Partnerships in collaborations: trust
- Trust as basis to improve: alignment of methods, ensurance of consistency and good quality

Success factor: Relevancy (and timing)

- Principle topic selection: national relevancy is key
- Principle transferability: the more structured HTA, the better to update at different times

successes, value and **impact** 3/3

Vision for JA3 – complete roll-out – from EUnetHTA to national HTA

- Template is being used by MS
- Core-Model is being used by MS
- English as working language
- QA-System is in place

No differentiation in format, language, quality (besides contextualization) between national and EUnetHTA products (in certain products: pre-coverage STA/ REA,)

= efficient use of resources (no duplication), good practice in methods and processes → sustainable European collaboration

**It was and is a long way to go,
but we are not too far away !**

Thank you
Any questions?
