

**How can  
we make better  
use of health  
technologies?**

eunethta

## **European network for Health Technology Assessment**

EUnetHTA was established to create an effective and sustainable network for Health Technology Assessment (HTA) across Europe - we work together to help developing reliable, timely, transparent and transferable information to contribute to HTAs in European countries.

Supporting collaboration between European HTA organisations that brings added value at the European, national and regional level, EUnetHTA:

- facilitates efficient use of resources available for HTA,
- creates a sustainable system of HTA knowledge sharing,
- promotes good practice in HTA methods and processes.
