EUnetHTA JA2 WP8 DELIVERABLE

Overview of HTA Core Model Training Materials

The EUnetHTA JA 2 (2012-2015) has received funding from the European Union, in the framework of the Health Programme

Joint Action on HTA 2012-2015

Overview of HTA Core Model Training Materials

Version 1.0

4 April 2016

Was developed by
Work Package 8 – Maintenance of HTA Core Model® infrastructure
to support shared production and sharing of HTA information

WP 8 Lead Partner: National Institute for Health and Welfare

Disclaimer: EUnetHTA Joint Action 2 is supported by a grant from the European Commission. Overview of HTA Core Model Training Materials

Training in the HTA Core Model was organised within Joint Action 2 in two different formats:

- A general overview of the Model, as well as a brief demonstration of its use, was given during the WP2 *training days/courses*, where the session(s) on the Model was/were embedded within a full-day course that covered several other EUnetHTA themes too. Such training was organised for EUnetHTA partners and associates, as well as for stakeholder representatives.
- More in-depth training in the Model and the online tool was given within specific *HTA Core Model training courses*, organised by WP8. These courses focused on the Model and its utilisation only and other EUnetHTA tools were not covered. The courses' content was a mix of theoretical and practical (hands-on) training in the Model and its use, and specifically in using the HTA Core Model Online.

This document contains an overview of HTA Core Model training materials produced for these two settings. A selection of the most recent versions is included, most of them publicly available. The majority of the materials has been produced to support self-learning and – if not otherwise specified – can be used as such, without specific further guidance in the form of lectures or courses. On the other hand, the complexity of the overall HTA process and realizing the possibilities of the new tools in the process most likely requires that interactive training methods (for example hands-on training courses) are offered in the future in parallel with the self-learning materials.

Some of the key materials listed below have been included also in the HTA Core Model Handbook. Since the documents may undergo changes in the future, the Handbook should be viewed as the primary source listing the most recent guidance documents (but not necessarily all presentations and teaching materials of various courses).

HTA Core Model User Guide

A general introduction to the Model and its utilisation in different settings. While the focus of the guide is in using the Model within HTA projects, it is likely to be useful in other health-related research projects as well.

Available through the Handbook at www.htacoremodel.info/ViewHandbook.aspx (public).

HTA Core Model Online User Guide

A practical guide for using the HTA Core Model Online. With the help of this guide anyone can make use of the online tool in their HTA project. The guide covers a full project from start to finish.

Available through the Handbook at www.htacoremodel.info/ViewHandbook.aspx (public).

Training Course Materials

The materials used during the HTA Core Model training course. While some of the 71 slides are intended for interactive, hands-on training sessions, much of the material is self-explanatory and can be utilised for self-learning. Specific sections for 1) theoretical background and utilisation of

the Model, 2) practical utilisation of the Model using the HTA Core Model Online, 3) utilisation of existing core HTA information, 4) principles steering the utilisation of the Model and core HTA information, and 5) terms of use for the Model.

Presentations

The following three audio/video recordings are available for the staff of EUnetHTA member agencies:

- Introduction to the HTA Core Model and core HTA information (K Lampe). A presentation given to EUnetHTA Partners and Associates on 5 May 2015 in Diemen, the Netherlands (46 minutes). <https://intranet.eunetha.eu/vctraining201505/> (requires EUnetHTA Id)
- Introduction to the HTA Core Model (K Lampe). A presentation to EUnetHTA Partners and Associates in a Webinar on 21 Sep 2015 (31 minutes). <https://intranet.eunetha.eu/vcwebinar20150921/> (requires EUnetHTA Id)
- Demonstration of the HTA Core Model Online tool (K Lampe). A presentation to EUnetHTA Partners and Associates in a Webinar on 21 Sep 2015 (29 minutes). <https://intranet.eunetha.eu/vcwebinar20150921/> (requires EUnetHTA Id)

Further useful reading

While not directly produced as training or learning materials, the following are recommended reading for anyone interested in the background, development and utilisation of the HTA Core Model.

1. Introduction. HTA Core Model 3.0. Pages 6 – 25. www.htacoremodel.info/model/HTACoreModel3.0.pdf (public)
2. HTA Core Model Licence www.htacoremodel.info/PoliciesAndTerms.aspx (public)
3. Policy for the HTA Core Model and core HTA information (particularly sections B and C). www.htacoremodel.info/PoliciesAndTerms.aspx (public)
4. Practical guidance for HTA projects within EUnetHTA, produced by JA2/WP4 and JA2/WP5. www.htacoremodel.info/ViewHandbook.aspx (public)
