

EUROPE
HTA2.0

Teaming Up for Value

October 30-31, 2014

Rome, Italy

Reaching a goal

Discovering and learning together

how to work across intellectual and other kinds of silos

to achieve greater value

Why *HTA 2.0 Europe – Teaming Up for Value*

Today Europe reinvents HTA

The dawn of HTA...

Interaction, collaboration, participation
are in the origins of the HTA concept

**Multidisciplinary assessment of
value**

So – what's new then?

- creating and harvesting networks advantages
 - Stakeholders as active participants
- interactivity on several levels
 - from passive dissemination to active data sharing and collaborative creation of information
- constant awareness outside the scope of your task
 - We drive the change – not just respond to it

Conference – live the 2.0 concept!

- interaction for results
- networks as platforms for progress
- both HTA doers and users as contributors to the HTA production process

Let's drive the change together!
