

Session 3

Discussion topics

- 1. The life-cycle of technology provides a good view-point in finding approaches to aligning regulatory and HTA requirements – how do you see that alignment happening? Is industry seeing an evolution?**
- 2. Evidence generation – before and after marketing approval/initial HTA**
- 3. What needs to be done at the policy level to support cooperation between regulators and HTA – both at the EU and national level?**
