

# EUnetHTA Topic Identification, Selection and Prioritisation “Other technologies”

Helene Arentz-Hansen, senior researcher PhD  
On behalf of **WP4 Lead partner** Norwegian Institute of  
Public Health, NIPHNO and WP4 Co- LP Other  
Technologies, LBI-HTA

# Objective

- ✓ To develop and refine a **system of horizon scanning, topic selection and prioritisation** in close collaboration with the relevant work packages.

## Topic Identification, Selection and Prioritisation Task Group (pharma and other technologies)

- 31 collaborating agencies
  - 9 agencies (10 persons) are authors
  - 22 agencies are reviewers
  - Coordination by WP4 Lead Partner (Vigdis Lauvrak), NIPHNO, Norway
- 
- ✓ F2F meeting of authors Other Tech
  - ✓ F2F meeting of authors Pharma
  - ✓ F2F meeting with EMA (jointly with WP1 and Payers representatives)
  - ✓ Teleconferences with authors

# How we have worked with TISP

**1. Developed draft recommendations** for Horizon Scanning, Topic Identification, Selection and Prioritisation for European cooperation on HTA  
- Consultation by EUnetHTA partners and stakeholders from June 2018 to September 2018

**2. Translation of recommendations into project plans for the pilots**  
– January/February 2019

**3. Running the TISP pilots** – currently ongoing  
Separate pilots for OT and pharma

## Next steps

- The pilots will inform **final recommendations** Horizon Scanning/TISP beyond 2020 – *October 2019*

# Aim of TISP pilots

The aim of the pilots is to explore a workflow for voluntary collaboration on topic identification, selection and prioritisation for joint collaboration on relative effectiveness assessments.

The pilot team:

**NIPHNO, LBI, AGENAS, NSPHMPDB, NICE**

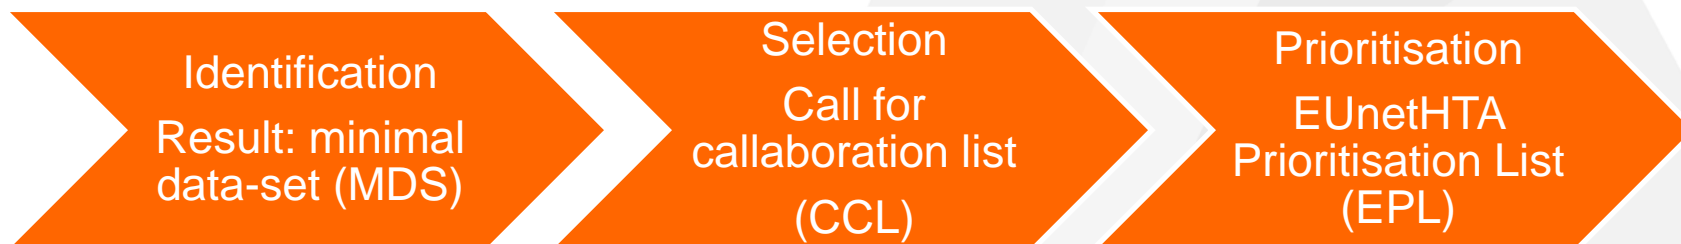

# Steps of the TISP pilot process for «other technologies»

- Partners
- POP DB
- External stakeholders
- Existing horizon scanning systems

## Outside scope:

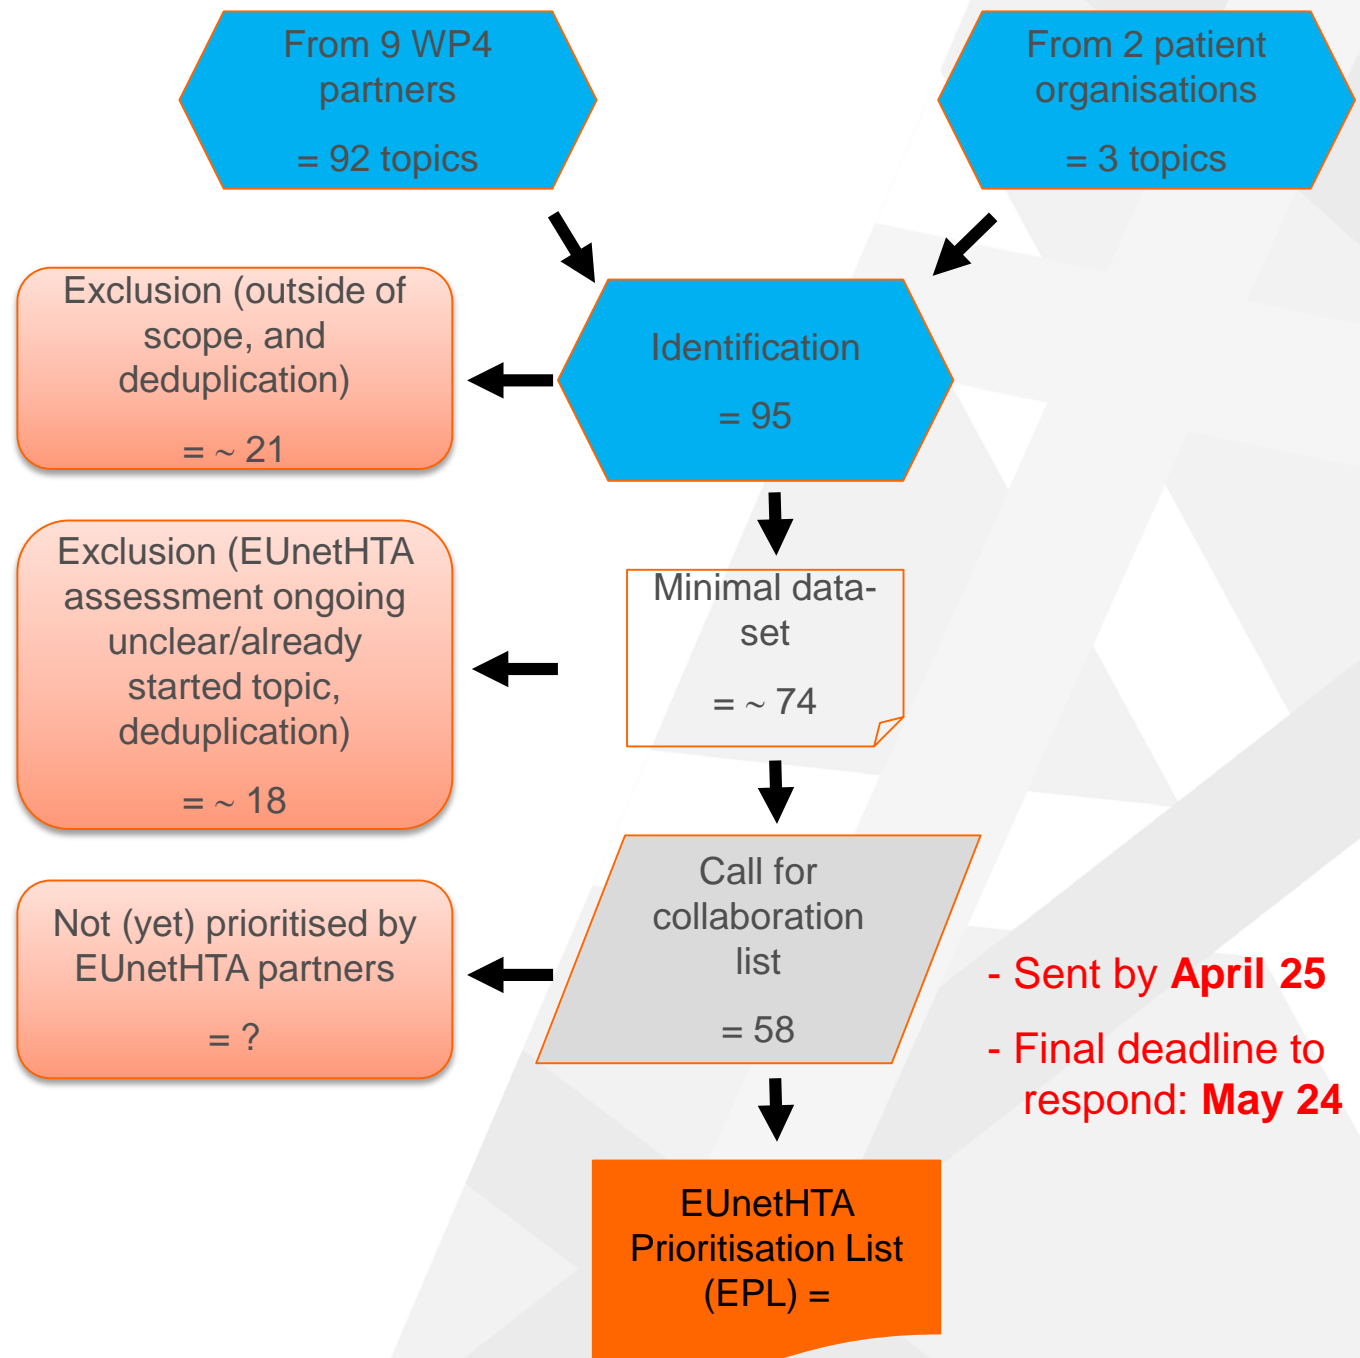

- Not a MD or IVD
- No CE mark, no clinical data available or clinical data not expected within the next 12-24 months
- Already identified (duplicate)

# The call for collaboration list for “other technologies” were sent out to WP4 partners

# TISP pilot: medical devices and in vitro diagnostics

**Thank you**  
**Any questions?**
