**Guidance Document**

**D7.1 – Practical Guideline for interaction between Health Technology Developer  
and HTA bodies**

**Version 0.1, 22.04.2022**  
**Template version 1.0, October 2021**

## 26 Document history and contributors

Version	Date	Description
V0.1	22/04/2022	First draft
V0.2	22/06/2022	Second draft
V0.3	20/07/2022	For Public consultation

27

## 28 Disclaimer

29 This Guidance document was produced under the Third EU Health Programme through a service  
30 contract with the European Health and Digital Executive Agency (HaDEA) acting under the mandate  
31 from the European Commission. The information and views set out in this guidance document are those  
32 of the author(s) and do not necessarily reflect the official opinion of the Commission/ Executive Agency.  
33 The Commission/Executive Agency do not guarantee the accuracy of the data included in this study.  
34 Neither the Commission /Executive Agency nor any person acting on the Commission's / Executive  
35 Agency's behalf may be held responsible for the use which may be made of the information contained  
36 therein.

## 37 Participants

<b>Hands-on Group</b>	Austrian Institute for Health Technology Assessment [AIHTA], Austria Gemeinsamer Bundesausschuss, [G-BA], Germany National Centre for Pharmacoeconomics, St. James Hospital, [NCPE], Ireland Zorginstituut Nederland, [ZIN], The Netherlands
<b>Project Management</b>	Zorginstituut Nederland, [ZIN], the Netherlands
<b>CSCQ</b>	Agencia Española de Medicamentos y Productos Sanitarios [AEMPS], Spain
<b>CEB</b>	Austrian Institute for Health Technology Assessment [AIHTA], Austria Belgian Health Care Knowledge Centre, [KCE], Belgium Gemeinsamer Bundesausschuss, [G-BA], Germany Haute Autorité de Santé, [HAS], France Institut für Qualität und Wirtschaftlichkeit im Gesundheitswesen, [IQWiG], Germany Italian Medicines Agency, [AIFA], Italy National Authority of Medicines and Health Products, I.P., [INFARMED], Portugal National Centre for Pharmacoeconomics, St. James Hospital, [NCPE], Ireland National Institute of Pharmacy and Nutrition, [NIPN], Hungary Norwegian Medicines Agency, [NOMA], Norway The Dental and Pharmaceutical Benefits Agency, [TLV], Sweden Zorginstituut Nederland, [ZIN], The Netherlands

38 The work in EUnetHTA 21 is a collaborative effort. While the agencies in the Hands-on Group will be actively writing the  
39 deliverable, the entire EUnetHTA 21 consortium is involved in its production throughout various stages. This means that the  
40 Committee for Scientific Consistency and Quality (CSCQ) will review and discuss several drafts of the deliverable prior to  
41 validation. Afterwards the Consortium Executive Board (CEB) will endorse the final deliverable prior to publication.  
42

# 93 1 GENERAL PRINCIPLES AND PURPOSE

## 94 1.1 General principles

95 During Joint Action 3 (JA3) procedures have been developed and tested regarding the interaction  
96 between Health Technology Developers (HTD) and Health Technology Assessment bodies (HTAb).  
97 When defining procedures for future interaction between HTD and HTAb, it is important to ensure the  
98 independence of the Joint Clinical Assessments (JCA) and Joint Scientific Consultations (JSC)  
99 assessment teams. It also is important to ensure procedurally fair processes for HTD. In addition, it is  
100 important that the procedures are in line with the steps outlined in the Health Technology Assessment  
101 Regulation (EU) 2021/2282 (hereafter referred to as HTAR).

102 While this guidance follows the requirements as set out in the HTAR, the HTAR is not yet applied,  
103 therefore the EUnetHTA 21 Service Contract does not follow the same legal framework as the HTAR.  
104 This means that activities (JCA and JSC) carried out within EUnetHTA 21 may have a more interactive  
105 process with the HTD than the JCA and JSC carried out under the HTAR. Therefore, this guidance  
106 document describes in some cases the process for EUnetHTA 21 and the recommended process for  
107 under the HTAR. Chapter 3 will explain this in more detail.

## 108 1.2 Purpose and Scope

109 This document defines the objective and extent of any formal interaction between HTAb and HTD for  
110 JCA and JSC, based on requirements set out in the HTAR and experiences from EUnetHTA Joint Action  
111 3.

112 This document does not describe the interaction with HTD as a stakeholder for EUnetHTA 21  
113 deliverables, this is described in a separate SOP.

114 During EUnetHTA 21, more interaction with HTDs may take place than what is foreseen in the HTAR,  
115 due to the fact that the HTAR is not into force yet.

116

## 117 1.3 Relevant articles in Regulation (EU) 2021/2282

118 The HTAR specifies in a number of recitals and articles the interaction between HTD and HTA bodies.  
119 Table 1-1 shows which of these HTAR recitals and articles refer to JSC and/or JCA and in what stage  
120 of the production. For a complete overview, see Appendix 1.

121 *Table 1-1: Recitals and articles of the HTAR referring to interaction between HTD and HTA*

JSC	
<b>Selection of Health Technologies for JSC</b>	Art 17 (1), (2): HTD may request JSC Art 17 (4): inform HTD about selection
<b>Submission of information by HTD</b>	Art 18 (2): submission of information by JSC
<b>Conduct of JSC</b>	Art 16 (1) and Art 18 (7): meeting with HTD during JSC
<b>Share outcome of JSC with HTD</b>	Art 19 (2), Art 30 (1c)
JCA	
<b>Selection of Health Technologies for JCA/CA</b>	Art 7 (1): Health Technologies subject to a JCA Art 8: Initiation of a JCA
<b>Scoping process</b>	Recital 25: inclusive scoping process Art 8 (6): Consider HTD input on PICO Art 10 (1): Inform HTD about final PICO & request submission dossier

<b>Submission dossier</b>	Recital 36: timeframe for JCA and deadline for submitting data Art 10 (2) (5), (6), (8): - Submitting of dossier - Check for completeness & inform HTD about continuation or discontinuation
<b>Assessment process</b>	Recital 36: timeframe for JCA production Art 11 (2): Interaction with HTD in case clarifying questions during JCA Art 11 (5): - Factual accuracy check by HTD of draft JCA report - HTD to flag which sections are confidential
<b>Publication of JCA/CA</b>	Art 12 (4): Inform HTD about publication final JCA
<b>Secure system for data sharing</b>	Art 30 (1c)

122

123

## 124 2 ACTORS AND THEIR SCOPE

### 125 2.1 HTA bodies

126 HTAb are responsible for conducting the JSC and JCA work. Therefore, this term refers to the JSC and  
127 JCA Assessor and Co-Assessor, Secretariat, the members of the Committee for Scientific Consistency  
128 and Quality (CSCQ), and the Consortium Executive Board (CEB).

129 The Secretariat is responsible for all external communication, to ensure the independence of the  
130 Assessor and Co-Assessor. HTAb Assessor and Co-Assessor should have no direct interaction with the  
131 HTD. Should the HTD reach out to them directly with questions on the EUnetHTA 21 JCA or JSC, the  
132 Assessor and Co-Assessor should direct them to the Secretariat.

### 133 2.2 HTD

134 For JCA, the HTD is requested to follow the *JCA manual for HTD*<sup>1</sup>. In summary, the HTD is requested  
135 to inform the Secretariat about the claimed indication and a contact person (in EUnetHTA 21 this  
136 happens with the submission of a Letter of Intent), provide a submission dossier following the  
137 consolidated PICO(s) (Population, Intervention, Comparator(s) and Outcome(s)), join the PICO  
138 information meeting (only for EUnetHTA 21), and perform a factual accuracy check of the draft JCA  
139 report validated by the CSCQ. In EUnetHTA 21, the HTD is requested to provide timely information and  
140 status updates on the regulatory process, challenges and potential deviations in the regulatory timetable.

141 For JSC, the HTD is requested to follow the *JSC procedural guidance* published on EUnetHTA 21 and  
142 EMA websites<sup>2</sup>.

143 The HTD is not allowed to communicate directly with Assessors and/or Co-Assessors of JCA or JSC,  
144 nor interact with other HTAb about the ongoing JCA or JSC on a European level unless it is publicly  
145 available information.

146 For JSC, national consultations must be requested directly from the Member State (MS). A national  
147 consultation should complement and/or address context-specific issues related to the national HTA

---

<sup>1</sup> This document is under developement. It most likely will follow a similar structure as the industry procedure manual developed in Joint Action 3, but of course the content will be updated to reflect the requirements from the HTAR and the EUnetHTA 21 deliverables.

<sup>2</sup><https://www.eunetha.eu/wp-content/uploads/2021/11/Guidance-on-parallel-consultation.pdf?x69613&x16454>

148 system of the specific MS (see also Article 16 (4) HTAR). Duplicated full scientific consultations at the  
149 national level (similar questions for the JSC and the national advice) are not foreseen according to the  
150 HTAR provisions. Clarification meetings on the national positions are exempted but should not re-  
151 address agreed on positions. When requesting a national consultation, the HTD must inform HTAb about  
152 the JSC/JCA that have taken place or are ongoing on a European level.

## 153 **3 RULES OF THE COLLABORATION**

### 154 **3.1 Confidentiality**

155 There will be no confidentiality agreement between the participating HTD and EUnetHTA 21, neither for  
156 a JSC process, nor for a JCA.

157 Detailed rules on confidentiality of submitted information by the HTD, are described in the process for  
158 commercially sensitive and academic-in confidence data (part of D7.1 documents – to be hyperlinked  
159 when available). Further information about the confidentiality, publication and citation policy of the  
160 submission dossier for a JCA can be found in the submission dossier requirements. The final  
161 submission dossier is published, together with the final JCA report.

### 162 **3.2 Status of Outputs**

163 For JCA, the HTD should follow the JCA Manual for HTD. This manual is binding and describes which  
164 (version of the) tools, templates, guidelines etc. are to be used during the JCA. The manual will be  
165 shared with the HTD after they submitted their Letter of Intent and once they have been accepted for a  
166 JCA in EUnetHTA 21.

167 Once a Letter of Intent is submitted and the Health Technology is accepted by EUnetHTA 21 for a JSC  
168 or JCA, the process officially starts. As soon as the HTD has submitted their draft briefing book (for JSC)  
169 or the submission dossier (for JCA), the process cannot be terminated by the HTD. This means the  
170 documents submitted by the HTD cannot be withdrawn and the JCA/CA or JSC process will continue  
171 also with publication of documents as required for the JCA/CA or JSC procedure. However, the HTD  
172 should inform EUnetHTA 21 about any changes in the development plans that might have  
173 impact on the ongoing JSC or JCA. In the event the HTD withdraws the product from the regulatory  
174 marketing authorisation process, if the HTD goes bankrupt or in case there is a negative outcome of the  
175 regulatory process, the JCA will be discontinued. In such event, there is no final JCA report and thus  
176 the submission dossier will not be published, however, the consolidated PICO will be published. For a  
177 JSC, Only aggregated generic information on JSC can be content of an JCA report, e.g. whether the  
178 HTD deviated from the common recommendation of the JSC. No information on product specific  
179 questions or national specifications nor the complete content of an advice can be published.

180 For EUnetHTA 21, all documents submitted by the HTD, are stored internally on the respective  
181 SharePoint page which all CSCQ members, appointed participants and Assessor and Co-Assessors  
182 have access to. For JCA, the CEB members will also have access to the documents submitted. For  
183 JSC, only the CSCQ members will have access.

184 If, for JCA in EUnetHTA 21, a PICO information meeting is held, such a meeting only serves the purpose  
185 to inform the HTD about the consolidated PICO(s), and there is no provision to alter the PICO(s) at this  
186 point and no final decisions will be taken during the PICO information meeting. No minutes will be  
187 published or shared with the HTD after the meeting, nor will the meeting be recorded. See section 4.2.1  
188 for further details.

189 Both in EUnetHTA 21 as in the HTAR, the final submission dossier (for JCA) will be published together  
190 with the final JCA report. See D7.1.3 (guidance on handling confidential data) for further details. In

191 EUnetHTA 21, re-use of the final JCA report will not be mandatory at the national level but is encouraged  
192 whenever possible.

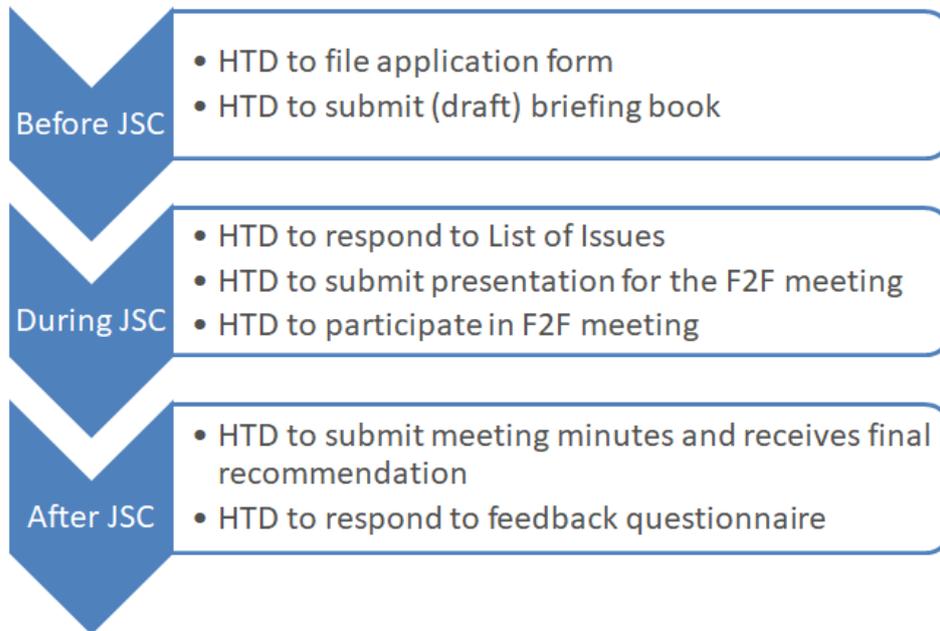

193 Both in EUnetHTA 21 as in the HTAR, comments provided by the HTD during a factual accuracy check  
194 of the final draft JCA report will be made publicly available, together with the Assessor and Co-Assessor  
195 answers to the comments, once the final JCA report is published. The process for a factual accuracy  
196 check is further detailed in the guidance document for factual accuracy check (part of the D7.1  
197 documents – to be hyperlinked when available).

198

199 **4 PROCESS**

200 **4.1 Joint Scientific Consultations**

201

202

203 *Figure 4-1: Process overview for JSC and Interaction between HTAb and HTD (for EUnetHTA 21 and HTAR)*

204 **4.1.1 HTAb and HTD interaction before JSC starts**

205 Application for JSC

206 Under the HTAR, it is envisaged that the Coordination Group shall publish the dates of request periods  
207 and state the planned number of JSCs for each of those request periods on the IT platform referred to  
208 in Article 30. At the end of each request period, where the number of eligible requests exceeds the  
209 number of planned JSCs, the Coordination Group shall select the health technologies that are to be  
210 subject to JSCs, ensuring the equal treatment of requests concerning health technologies with similar  
211 intended indications. The criteria for selecting from eligible requests for medicinal products and medical  
212 devices are outlined in the HTAR (Art. 17 (3)).

213 Within EUnetHTA21, the CSCQ publish the dates of the request periods (Open Call for JSC) and state  
214 the planned number of JSCs for each of those request periods on the EUnetHTA website and via social  
215 media. Within the request period the HTD has to submit an application form (link on EUnetHTA website)  
216 to the JSC secretariat. The HTD receives a confirmation of receipt.

217 At the end of each request period, the CSCQ select eligible applications which will be subject to JSC.  
218 The criteria for selecting eligible requests are publicly available <sup>3</sup> and are based on the criteria outlined  
219 in the HTAR and supplemented with additional prioritisation criteria for EUnetHTA 21.

220

---

<sup>3</sup> <https://www.eunetha.eu/jsc/>

221 Selection of products for JSC

222 At the end of the request period and following selection of eligible products applying the selection criteria  
223 stated in the Open Call for JSC, HTDs will be informed by the JSC secretariat/ the Coordination group  
224 (for the HTA R) whether they were selected for JSC. Where a request for JSC was refused, the HTD  
225 will be informed thereof and the reasons explained.

226 Submission of the (draft) Briefing book and check for completeness

227 The HTD must submit the briefing book to the JSC secretariat according to the published timeline for  
228 the accepted time slot. The HTD receives a Written Request for Clarification if there are missing items  
229 in the draft Briefing book, e.g. explanations on the study design or missing supporting documents on  
230 endpoints. The Applicant sends the final version of the Briefing Book (a “track changes” version and a  
231 “clean” version) taking into consideration Written Requests for Clarification, if applicable.

232 **4.1.2 HTAb and HTD interaction during JSC**

233

234 List of issues

235 Approximately 30 days after submission of the final Briefing book the JSC secretariat will share the  
236 EUnetHTA 21 List of issues and the template for Applicant’s Written Response, with the HTD. The HTD  
237 has to provide all introduced changes in a table format and to provide answers to “Issues to be  
238 addressed in writing only” at the JSC secretariat.

239 F2F - meeting

240 The HTD has to submit the slides that will be presented during the F2F meeting. . In case of any  
241 questions the JSC secretariat will give feedback on structure of the slides prior to the meeting if they  
242 need modification in structure to be suitable for the F2F meeting. The slides should follow the PICO  
243 scheme according to the Questions in the Briefing book and present the issues from the lists of issues  
244 of the HTAb and EMA to be addressed by the HTD during the F2F meeting. The HTD has to take  
245 meeting minutes.

246 **4.1.3 HTAb and HTD interaction after JSC**

247 The HTD sends the F2F meeting minutes to the JSC secretariat. The meeting minutes will only serve  
248 as a tool of record and will not be commented on by EUnetHTA 21, nor will they be included in the final  
249 recommendations.

250 Final recommendations

251 After the F2F meeting the HTD can expect the final written recommendations according to the timelines  
252 in the procedure for JSC.

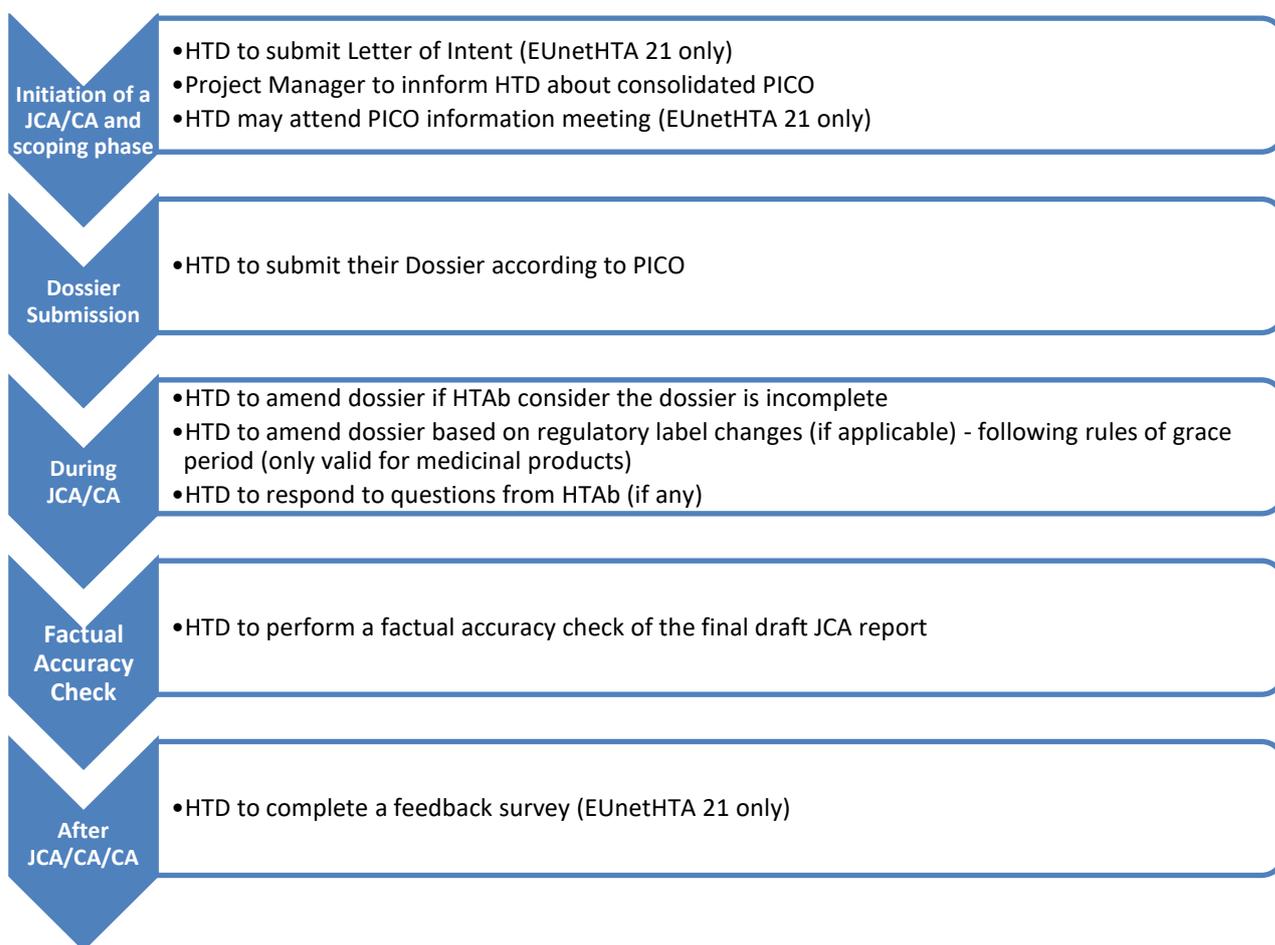

253 Evaluation

254 Participating HTD in a JSC are encouraged to submit their feedback on the procedure throughout the  
255 JSC production. After finalisation of the JSC, a feedback survey is sent to HTD by the JSC Secretariat.

256

257 **4.2 Joint Clinical Assessments**

258

259

260 *Figure 4-2: Process flow for JCA and interaction between HTAb and HTD (for EUnetHTA 21 and HTAR)*

261 **4.2.1 Initiation of a JCA and Scoping phase**

262 **Selection of Health Technologies for JCA**

263 Under the HTAR, article 7 defines the health technologies eligible for a JCA. For medicinal products,  
264 there is no additional selection process under the HTAR. For more information on the operationalisation  
265 of the selection process for Medical Devices JCA, see deliverable D4.7.3 and D4.7.4.

266 During EUnetHTA 21, the HTD is expected to submit a signed Letter of Intent, in which they indicate  
267 their intent to participate in a JCA. Submission of a Letter of Intent does not automatically lead to  
268 acceptance of the technology for a JCA in EUnetHTA 21. The Secretariat will inform the HTD once their  
269 technology is accepted for a JCA in EUnetHTA 21.

270 In the Letter of Intent, the HTD is requested to state the contact person for the JCA process, the claimed  
271 indication and the anticipated regulatory pathway.

272 A Letter of Intent is not foreseen under the HTA Regulation.

273 **Submission of PICO(s) & Request Submission Dossier**

274 Both under the HTAR and EUnetHTA 21, as per Art 10 (1) of the HTAR, the Secretariat informs the HTD  
275 about the consolidated PICO(s) for the JCA and requests a completed submission dossier as per the

276 PICO(s) by a specified deadline. The HTD has to submit their JCA dossier, after the consolidated  
277 PICO(s) has been submitted to the HTD.

#### 278 ***PICO information meeting (only EUnetHTA 21)***

279 In the HTAR there is no meeting envisioned between the HTD and HTAb during or after the scoping  
280 process. In EUnetHTA 21, the HTD is invited to join a PICO information meeting, in which the assessor  
281 and co-assessor present the consolidated PICO(s). The purpose of this meeting is to provide the HTD  
282 with information on the consolidated PICO(s), and is not a meeting to discuss submission requirements.  
283 There is no provision to amend the EUnetHTA 21 consolidated PICO(s) at this point.

#### 284 **4.2.2 Submission Dossier for a JCA**

##### 285 ***Receipt of Submission Dossier & check of completeness***

286 Both under the HTAR and EUnetHTA 21, the Assessor and Co-Assessor perform a technical  
287 completeness check within 10 calendar days upon receipt of the submission dossier and the Secretariat  
288 performs a procedural completeness check. The HTD has to submit a dossier according to the scope of  
289 the JCA (i.e. submit data or prove there is no data available for all identified PICO(s)), otherwise the  
290 dossier has to be declared incomplete. A list of missing items (LoMI) will be shared with the HTD by the  
291 end of this check. The time for providing the amended dossier responding to the LoMI depends on the  
292 JCA procedure (i.e. medicinal products or medical devices). The objective of the technical check of  
293 completeness is to ensure completeness of the dossier to avoid interaction (via Secretariat) between  
294 the HTD and the Assessor and Co-Assessor during the actual assessment.

295 The HTD has to make sure the consolidated PICO(s) are addressed in the submission dossier. In case  
296 of any deviations a sound justification must be provided.

297 In EUnetHTA 21, in case the HTD does not provide the amended Submission Dossier by the deadline,  
298 or the Submission Dossier is still considered incomplete by the Assessor and Co-Assessor, the  
299 Assessor and Co-Assessor will discuss with the CSCQ and CEB if they can proceed with the JCA or  
300 whether the JCA should be discontinued.

301 For medicinal products only: Although EUnetHTA 21 does not have clock-stops, a grace period to  
302 amend the Submission Dossier is allowed if CHMP opinion differs from what was anticipated and only  
303 to those sections impacted by the CHMP opinion. The need for and duration of a grace period has to be  
304 approved between the Assessor and Co-Assessor and the Secretariat, but can take a maximum of 10  
305 calendar days (starting once CHMP opinion is available). During the grace period the Assessor and Co-  
306 Assessor will update the PICO, which will be published approximately 1 week after CHMP opinion.

##### 307 ***Formal interaction with HTD during the JCA***

308 As per Art. 11(2), interaction with the HTD should be possible at any time during preparation of the JCA  
309 in case the Assessor and Co-Assessor consider that further specifications or clarifications or additional  
310 information, data, analyses or other evidence are necessary in order to carry out the assessment. In this  
311 case, the Secretariat reaches out to the HTD with a formal request to provide such information, data,  
312 analyses or other evidence. Depending on the type of request, a deadline (with a maximum of 5 calendar  
313 days for medicinal products and 14 calendar days for MDs/IVDs) to provide the requested information  
314 will be communicated.

315 Both under the HTAR and EUnetHTA 21, according to art. 11(2), where new clinical data becomes  
316 available during the assessment process, the HTD concerned shall proactively inform the Coordination  
317 Group about this prior to the start of the JCA indicating anticipated timelines when it will become  
318 available. Within EUnetHTA 21, this means that the HTD shall inform the Secretariat.

319 The Secretariat is responsible for communicating any questions from the Assessor and Co-Assessor to  
320 the HTD, requesting the required input from the HTD and sharing the received input with the assessor  
321 and co-assessor.

322 There will be no direct contact between the HTD and the Assessor and/or Co-Assessor during the JCA,  
323 outside of the PICO information meeting.

#### 324 **4.2.3 Factual accuracy check of JCA by HTD**

325 Art. 11(5) specifies that the draft JCA reports shall be provided to the HTD. Within EUnetHTA 21, the  
326 draft reports that will be shared are the drafts validated by the CSCQ. The HTD shall signal any purely  
327 technical or factual inaccuracies in accordance with the timeframes established pursuant to Article 15.  
328 For more information on the factual accuracy check, please see the document D7.1 Procedure and  
329 Framework for the Factual Accuracy Check

#### 330 **4.2.4 HTA and HTD interaction after JCA**

##### 331 **Publication of a JCA**

332 Once the final JCA report, submission dossier and answers/comments from the factual accuracy check  
333 are published, the Secretariat shares the link with the HTD.

##### 334 **Evaluation (EUnetHTA 21 only)**

335 Participating HTD in a JCA are encouraged to submit their feedback on the procedure throughout the  
336 JCA production. After each JCA is finalised, a survey is sent to HTD

##### 337 **Error reporting procedure**

338 In case potential errors are identified in a EUnetHTA 21 JCA report after its publication, EUnetHTA can  
339 start the error reporting procedure. The person reporting the error is requested to reach out to  
340 [eunetha@zinl.nl](mailto:eunetha@zinl.nl), and state the following:

- 341 • Your affiliation and contact details;
- 342 • Specifically describe the potential error you discovered (mention the title of the report (and the  
343 project ID), state both the page number and the specific sentence, and mark the error);
- 344 • If applicable, please also submit a reference to a source where the correct information can be  
345 found.

346  
347 More information can be found [here](#).

## 348 **5 PRACTICAL ISSUES**

### 349 **5.1 Contact Points (EUnetHTA 21 only)**

350 The JCA Secretariat ([JCA/CA\\_Secretariat@zinl.nl](mailto:JCA/CA_Secretariat@zinl.nl)) is the primary point of contact for the HTD for JCA  
351 on medicinal products and medical devices.

352 The JSC Secretariat ([EUnetHTA21-JSC@g-ba.de](mailto:EUnetHTA21-JSC@g-ba.de)) is the primary point of contact for the HTD for JSC.

353 **5.2 Other**

354 A secure system will be used for data sharing between HTD and EUnetHTA 21, in the form of a secure  
355 e-mail system, Eudralink or through SharePoint.

356 **6 CONSIDERATIONS FOR THE HTAR**

- 357 - Appoint a dedicated Secretariat per JSC and JCA  
358 - A secure data sharing system has to be used  
359 - Use a JSC and JCA HTD manual, which explain the process and formal points for interaction  
360 between HTD and HTAb  
361 - Use a tool to confirm and keep track of tools, templates, procedures and guidance that are  
362 applicable for the specific JSC and JCA  
363 - Consider using a form by which the HTD can provide information on the following:  
364     o the contact person for the JCA process,  
365     o the claimed indication/intended use  
366     o the anticipated regulatory pathway and respective timelines  
367 - Discuss if new evidence can be accepted during an ongoing JCA and if so, define a process for  
368 submission of this new evidence during an ongoing JCA

369
